DOLLARS AND SENSE OF AERIAL SPRAYING

REMEMBER, TRACKS COST MONEY!

Minimum of 2-3% where no potholes or slews are present.

Canola TRACKS

50 Bushels / Acre x 3% = **1.5 Bushels**

1.5 Bushels x \$9.00 / Bushel = **\$13.50 acres under the tires**

Above the cost of your sprayer payment which you have to make regardless, is the cost of:

Fuel • Wages • Maintenance • Compaction • Needing to disk down tracks in fall (more fuel & time) • Swathing issues • Crop laying down because of tracks • Sprayer hours / trade-in value

Let's call all the above \$2.50 / acre, above what you already are paying for your ground sprayer.

NOW LETS ADD THE TRACKS

\$13.50/acre + additional costs \$2.50/acre =

\$16.00 an acre = GROUND (farm owned sprayer)

3 Gallon Aerial Fungicide Application

\$9.75 an acre = AIR

What would the savings on your farm be?

REMEMBER, YOUR TIME IS VALUABLE!

If there was a service that you could have on your farm, that was free... would you use it? Aerial application pays for itself in TRACK savings alone. That leaves you, or your staff to focus on the 100's of other jobs that seem to pile up during the summer! Not to mention, time at the lake with the family!

Farmer Quote - "The biggest reasons I have been able to grow my farm as fast as I have, are the hours I have been able to spend in the office or focussed on planning. Land deals, marketing grain, planning my day, crunching the numbers, creating efficiencies, and building industry relationships."

MAXIMIZING YOUR RETURN THROUGH TIME MANAGEMENT AND EFFICIENCY

AERIAL SEEDING • AERIAL SPRAYING • AERIAL FERTILIZING
HIGHER WATER VOLUMES!!

“Why would I hire custom ground to do my fungicide or insecticide, pay him the \$5 an acre and then also lose the money from tracks. The airplane just makes sense if I have one available to work with!”

“It is no longer a question that Aerial Application is a valuable and effective tool to have at your disposal and we are seeing that in our customers satisfaction, and planning. You need a partner you can plan with year after year, that will take care of the annual fungicide, insecticide, and desiccation needs on your farm!

Our Goal is superior communication, highest quality product delivery, and unparalleled timeliness! I want you to have the best bang for your buck that aerial application has to offer! With timing being so important with many applications, when we say we are going to have a job done for you, our goal is same day, next day service. We will do anything we can to provide this to our valued partners, YOU.

I want to deliver to you, what I would expect on my farm if I was hiring the service! Clayton Air Service is delivering crop protection products at **higher water volumes**, setup with optimal droplet size to get the job done. Clayton has worked as a calibration and spray pattern analyst across Canada, and ensures that CAS’s aircraft are in the optimal setup for the job being completed.

Clayton Air Service uses the most efficient, modern, high capacity aircraft, fitted with the latest GPS, and nozzle technology. We want to ensure that our equipment has the capacity to keep up with the growing demand, and timeliness that is so important for your farm!

Clayton Air Service goal is to be an ADDED VALUE company. We are not a cost to your farm, we want to be an asset. When we work together, we want to show you where we deliver paybacks, and savings in the long term financial and efficiency goals of your operation. The more we plan ahead together so we know what needs to be done, the more effectively I am able to deliver this service to you.

This business is not just a service business, it is a partnership. These are your aircraft, and I want to know how I can best deliver for your needs!

Give me a call so we can plan together! 306-497-7401

Partnership

If you are able to plan ahead with me on your aerial application acres, then I am able to invest, plan ahead to deliver the best, most reliable service to your operation. Timing is so important with some farms doing 2 fungicide applications, insecticide and desiccation. If you see the dollar savings in using an aerial application service like ours and I can count on your work give me a call and lets make a plan!! When I know what your planning, I can make sure I **ALWAYS** have the equipment available. We commit 100% to those farm operators that want to partner with us. Those who partner with us can consider these **THEIR AIRPLANES**.

Dedication to Success

MY GOAL – is to make your operation a success,
MY GOAL – is to add value to your operation
MY GOAL – Is to be a service you can partner with and rely on
MY GOAL – is to create a relationship where you can count on me, and I can count on you! I have put everything I have into creating a service than can be as reliable as possible, efficient as possible, as we communicate and work with your farm. I know as I deliver this service to you, it will build our working relationship into a long term success!
